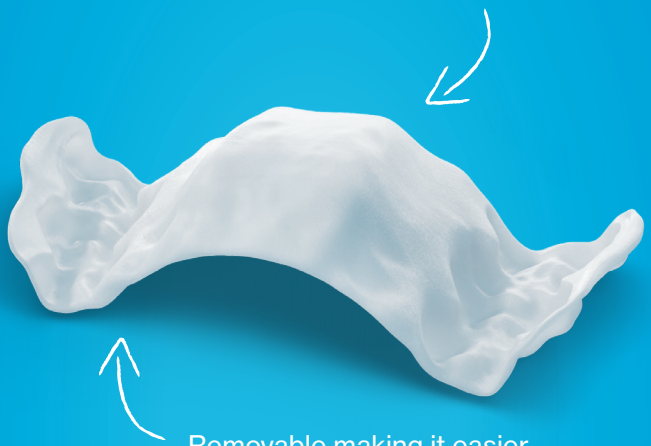
The **Invisalign Palatal Expander System** is a set of removable custom-fit, 3D printed expanders.

Designed for comfort.*



Removable making it easier to maintain oral hygiene.

You simply swap out each Invisalign expander for the next one in the series until your child's palate is in their doctor's desired position.

invisalign.com.au/palatal-expander

*For example, each Invisalign Palatal Expander and Holder has a smooth lingual surface and the palatal region has customised thickness based on the patient's own palate

Invisalign Palatal Expanders consist of a series of plastic removable orthodontic expanders that gently move patients' skeletal and/or dental narrow maxilla. Invisalign Palatal Holders consist of a series of plastic removable orthodontic retainers to hold and stabilise the maxilla after expansion. These products are not available for purchase by the general public. However, these products are available for purchase from an Invisalign trained dentist or orthodontist. Invisalign NZ Ltd, Christchurch New Zealand.

invisalign® PROVIDER

Why choose the Invisalign Palatal Expander?

A positive experience for kids and parents.

Every set of expanders is custom-fit to your child's mouth and 3D-printed for a sleek design, providing an experience that is designed for comfort.*

Removable helping kids to maintain oral hygiene.

Your child can easily pop out the Invisalign Palatal Expander to brush and floss as usual.

So easy a kid can do it.

Most children can pop the expander in and out and swap expanders on their own, no matter what their age.

No food restrictions.

Sticky foods and kid favourites like noodles, pizza, and peanut butter do not pose a concern. Help keep mealtimes simple with an expander that's easy to pop out and clean.
